

Question #1: Sequencing Transformations.

Name the transformations that carry Pre-Image to Image. Complete the transformations in the fewest number of steps.

Be specific and draw any vector translations, locate and draw any center of rotation, state the direction and angle of rotation, draw any line of reflection.

Question #2: Sequencing Transformations.

Name the sequence of transformations that carries the Pre-Image to the Image.

Be specific and draw any vectors illustrating the translation, state the center of any rotation, along with any angle of rotation, and draw any line of reflection.

Be efficient and complete the transformations using the smallest number of steps.
