 - a. Sketch the graph of g(x) = 3x 2 on the same grid.
 - b. Sketch the graph of h(x) = 3(x 2).
 - c. Describe how f(x), g(x), and h(x) are different and how they are the same.

- 11. SHOW geometric work in your drawings to locate the following:
 - a) Find the line of reflection that carries ABC onto image A'B'C'. Draw the line of reflection.
 - b) Find the center of rotation that carries A'B'C' onto image A"B"C". Label the center P and measure the angle of rotation.
 - c) Find the translation vector that maps A"B"C" onto image A""B""C". Draw the vector. Measure its length in cm.
