

FRIDAY February 14, 2014

Class & Homework

1. For each triangle, complete the 3 trig ratios.
Simplify all fractions and square roots.

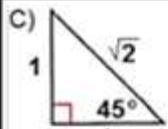

$$\begin{aligned}\sin(30) &= \frac{1}{2} \\ \cos(30) &= \frac{\sqrt{3}}{2} \\ \tan(30) &= \frac{1}{\sqrt{3}} = \frac{\sqrt{3}}{3}\end{aligned}$$

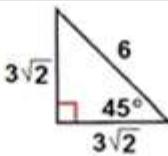

$$\begin{aligned}\sin(30) &= \frac{5}{10} = \frac{1}{2} \\ \cos(30) &= \frac{5\sqrt{3}}{10} = \frac{\sqrt{3}}{2} \\ \tan(30) &= \frac{5}{5\sqrt{3}} = \frac{1}{\sqrt{3}} = \frac{\sqrt{3}}{3}\end{aligned}$$

What do you notice about the ratios for each triangle?

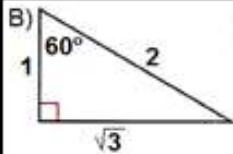

$$\begin{aligned}\sin(45) &= \frac{1}{\sqrt{2}} = \frac{\sqrt{2}}{2} \\ \cos(45) &= \frac{1}{\sqrt{2}} = \frac{\sqrt{2}}{2} \\ \tan(45) &= 1\end{aligned}$$

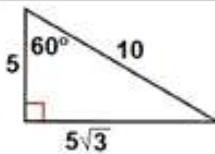

$$\begin{aligned}\sin(45) &= \frac{3\sqrt{2}}{6} = \frac{\sqrt{2}}{2} \\ \cos(45) &= \frac{3\sqrt{2}}{6} = \frac{\sqrt{2}}{2} \\ \tan(45) &= 1\end{aligned}$$

What do you notice about the ratios for each triangle?

$$\begin{aligned}\sin(60) &= \frac{1}{2} \\ \cos(60) &= \frac{\sqrt{3}}{2} \\ \tan(60) &= \frac{1}{\sqrt{3}} = \sqrt{3}\end{aligned}$$

$$\begin{aligned}\sin(60) &= \frac{5}{10} = \frac{1}{2} \\ \cos(60) &= \frac{5\sqrt{3}}{10} = \frac{\sqrt{3}}{2} \\ \tan(60) &= \frac{5}{5\sqrt{3}} = \frac{1}{\sqrt{3}} = \sqrt{3}\end{aligned}$$

What do you notice about the ratios for each triangle?

2. Solve each proportion for the variable X.

a) $\frac{\star}{\square} = \frac{x}{\Delta}$

b) $\frac{\square}{x} = \frac{\Delta}{\star}$

c) $\frac{\square + x}{\star - x} = \frac{\star}{\square}$

d) $\frac{\square - x}{\star} = \frac{\Delta + x}{\Delta}$

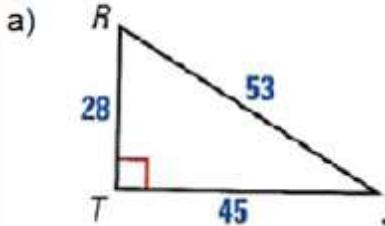

e) $\frac{7}{6} = \frac{x}{9}$

f) $\frac{3}{x} = \frac{5}{11}$

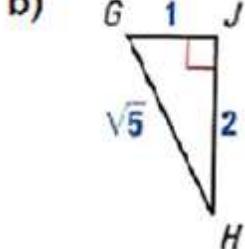

g) $\frac{4+x}{3-x} = \frac{12}{5}$

h) $\frac{7-x}{5} = \frac{9+x}{8}$

- 3) Find the sine, cosine and tangent ratio for each acute angle of the triangle. Each answer should be expressed as a reduced fraction.

$$\begin{aligned}\sin R &= \frac{28}{53} \\ \cos R &= \frac{45}{53} \\ \tan R &= \frac{28}{45} \\ \sin S &= \frac{45}{53} \\ \cos S &= \frac{28}{53} \\ \tan S &= \frac{45}{28}\end{aligned}$$

$$\begin{aligned}\sin H &= \frac{1}{\sqrt{5}} \\ \cos H &= \frac{2}{\sqrt{5}} \\ \tan H &= \frac{1}{2} \\ \sin G &= \frac{2}{\sqrt{5}} \\ \cos G &= \frac{1}{\sqrt{5}} \\ \tan G &= 2\end{aligned}$$

- 4) Write a trig ratio in terms of one of the missing sides.

Use the trig ratio to solve for the value of the missing side.
